RED UNIT

Inspection

Type: ROUTINE INSPECTION

Date: NOV-07-2002

2.40 (b)(2)

ATTENDING VETERINARIAN AND ADEQUATE VETERINARY CARE (DEALERS AND EXHIBITORS).

(b) Each dealer or exhibitor shall establish and maintain programs of adequate veterinary care that include:

(2) The use of appropriate methods to prevent, control, diagnose, and treat diseases and injuries, and the availability of emergency, weekend, and holiday care;

(Also refer to Policy 21, Control of Tuberculosis in Regulated Elephants, and Policy 22, Necropsy Requirements)

There were 4 elephants, Duchess, Ginny, Judy and Vicki that belong to (b)(6), (b)(7)c they are traveling with the Red unit and are under Ringling Brothers license. These animals last had their trunk washes for TB in September of 2001. This must be done at least one time every twelve months. The 11 elephants belonging to Ringling Brothers were just tested in September of 2002. These are in compliance.

Trunk washes must be performed on these four animals to provide evidence of the animals continued free status from TB. TB is a disease that is dangerous to both man and animals. Animals must be tested in a timely manner for their protection as well as for their handlers.

Correct by: 11/21/02

3.125 (c)

FACILITIES, GENERAL.

(c) Storage. Supplies of food and bedding shall be stored in facilities which adequately protect such supplies against deterioration, molding, or contamination by vermin. Refrigeration shall be provided for supplies of perishable food.

There was grain and bedding stored outside and uncovered. This must be covered to adequately protect it from the weather and pests. The storage area for grain was badly scattered there was feed on the floor that was breaking down. This area needs swept and reorganized to keep the feed clean and free of contamination.

All the feed must be reorganized and stored to protect it from the weather and contamination. This is necessary to provide clean wholesome feed to the animals.
